ABOUT ME

SDET | Big Data | Python Automation | Selenium | Pytest | Playwright

11.4 years of QA experience across ETL, Big Data, and UI automation in domains like Retail, Healthcare, and Telecom. Expertise in building scalable test frameworks using Python, Pytest, Selenium, and Playwright. Proven track record of increasing test coverage by 70%+, reducing regression cycles by 60%, and enabling CI/CD-ready automated pipelines using Jenkins and Git. Adept at designing test strategies, collaborating cross-functionally, and mentoring teams to ensure high-quality product delivery.

PROFILE SUMMARY

- Around 11.4 years of experience in **ETL and Big Data Testing, Hands on experience on:**
 - Hive, Mongo DB, Big Query, Oracle, MS SQL & All relational databases
 - UNIX commands and Shell Scripting
 - Hadoop/Big data platforms like Azure, GCP
 - API testing
 - Python Automation using Selenium and Playwright
- Proven experience using test management and defect tracking systems such as Jira, ALM, TestRail
- Multiple **domains** experience like **Telecommunications, Life sciences/Health care, Travel and Retail**
- Designed and implemented automation frameworks for UI (**using python, Selenium, Page Object Model pattern, Pytest, MS Playwright**) which improved the testing efficiency, test accuracy by 60% and drastically reduced the regression testing time and cost
- Experience in automation of regression/functional test cases in **Selenium Web Driver using Python** programming language.
- Implemented **automated test reporting** using **Allure and HTML reports** in CI/CD pipelines, improving test traceability, failure analysis, and team collaboration.
- Experienced in using **Jenkins** as a Continuous Integration (CICD) server to configure with Git/GitHub repository
- Experienced in writing Test Plans, defining Test Scenarios and Test Cases, developing and maintaining test scripts, analyzing bugs, interacting with development team and track the bugs till closure.
- Led multiple projects, Managed QA tasks in different SDLC (Agile, Iterative and Waterfall).
- Participated in all phases of project life cycle, including, understanding the requirements from System Engineers/End- Users, Requirement Analysis, System Testing, User Acceptance Testing (UAT) Environments, Support and Documentation.
- Managed multiple QA projects simultaneously with a focus and delivering highest quality product without jeopardizing product delivery schedules.
- Worked cross-functionally with other teams to streamline project deliverables (Agile Integration Team).
- Analysis of business requirements and change request specifications by interacting with users
- Coordinate with on site and offshore teams on project status calls and discussions.
- Maintaining the test artifacts on confluence.
- Ensuring timely completion and delivery of project to the client, extending production support of multiple applications.
- Well versed with various ETL tools like – **DataStage, Informatica, Talend (TAC), Azure Data Factory Pipelines (ADF pipelines), Airflow DAG Pipelines**
- Deliver project documentations such as ETL design specs, ETL Test strategy, Production Deployment Plans.

- Well versed with all the stages of SDLC (Software Development Life Cycle), STLC (Software Test Life Cycle) and Defect life cycle.
- Experience in **designing dashboards using Power BI and Tableau**
- An effective communicator with strong analytical, logical thinking & problem-solving abilities.
- Commitment to co-operative teamwork and involved in delivering high quality product to client.
- Good communication and interpersonal, ability to learn quickly and work within tight deadlines.

TECHNICAL SKILLS

- **Testing:** Big data testing/Hadoop testing, ETL/DWH Testing, BI Testing, Database Testing, Functional Testing
- **ETL Tools:** IBM DataStage 7.1, 7.5, 8.7, 11.3, Informatica, Talend (TAC console), ADF Pipelines, Airflow DAG
- **Databases:** Oracle 11g, MS SQL-2008, DB2, AWS Redshift, HIVE, Azure database, My SQL, Google Big Query, Mongo Db, Gremlin Db, Elastic Search, Kafka
- **Cloud Platforms:** AWS S3, GCP, Azure
- **Programming Languages:** Unix Shell Scripting, SQL, Python
- **Defect tracking tools:** HP Quality Centre, IBM Rational Clear Quest
- **Test Management Tool:** JIRA, TestRail, ALM QC
- **Reporting & BI Tools:** Tableau, Power BI, Kibana
- **API Testing:** Postman
- **Test Framework & Automation Tools:** Pytest, Jenkins, Git, Allure Reports, HTML Reports, Selenium Web Driver, MS Playwright
- **IDE:** Pycharm, IntelliJ

WORK EXPERIENCE

1.) Walmart – Bengaluru since Oct'2021 till June'2025

Role: Quality Engineer III – Big Data, UI functional testing, Automation testing

Projects Handled: GC2P – Global Compliance Policy Platform(react based UI application)

Technologies used: GCP Big query, Mongo db, UI functional testing using MS Playwright based python automation framework,

Domain: Retail

Role: QE & Automation tester

Description: This was basically a rule creation and authorization platform. The Global Compliance Policy Platform (GC2P) is end-to-end solution to automate the creation of policies for auto compliance; it included features such as policy simulation, allowing users to make "go or no-go" decisions based on specific policy. The Evidence Management feature allows users to store and organize evidence related to policies. Policy Metadata ensures that policies are properly categorized and tagged for easy retrieval. Lastly, the Policy Analytics feature provided post-policy analysis and insights.

Responsibilities:

- Analyze business requirements and work closely with developers to deliver high quality software. Translate system requirements into test scripts and test cases.
- Extensively involved in all stages of testing life cycle, **Test Driven Development methodologies (TDD), Software Development Life cycle (SDLC) using Agile methodologies.**
- Test Execution, defect creation, Report Project status and defect metrics to the team
- Built and maintained an automation framework using Python, Selenium, and Playwright from scratch.
- Improved test efficiency and reduced regression cycle time by over 60%.

- Implemented test reporting using Allure and HTML reports integrated in CI/CD pipelines.
- Performed data validations using complex SQL and BigQuery scripts.
- Created visual dashboards using Power BI integrated with SQL Server and Microsoft Power Automate.
- Collaborated with cross-functional teams including developers, product owners, and business analysts.
- Documented test cases and product features clearly in Confluence.

PREVIOUS WORK EXPERIENCES

- 2.) **Harman Connected Services** | Lead Product Engineer - ETL Testing **(May 2019 – Oct 2021)**
- 3.) **Alten Calsoft Labs Pvt. Ltd.** | Senior Engineer – Big Data Testing **(Dec 2017 – Mar 2019)**
- 4.) **IBM India Pvt. Ltd.** | Data Specialist – ETL Testing **(Mar 2014 – Dec 2017)**

ACADEMIC DETAILS

2013 B.E. in Power Electronics From VGEC, Gujarat Technological University – 78.7%

CERTIFICATIONS/ACHIEVEMENTS

- Completed IBM Certified Database Associate -Oracle 11g SQL Fundamentals
- IBM Manager's Choice Award – for 3 consecutive years (2015,2016,2017)
- Star of Sprint & Rising Star of the team for excellent contribution as QA Team Lead
- Certified Data Science with Python from Simplilearn
- Udemy Certifications on Python using Selenium, Power Bi and Tableau
